Subject: FCA responses to CARB AECD questions

Please find attached responses to ARB's questions regarding FCA's diesel emission control strategies. As directed, we have focused these responses on the MY 2014-2016 strategies (with a particular emphasis on MY 2016). We also have indicated where those strategies will change in MY 2017, and trust that this information will be helpful as ARB considers FCA's MY 2017 certification applications. We would be happy to answer any questions you might have. We understand that the intended focus of the discussion on Friday is the sufficiency of FCA's MY 2017 strategies for purposes of current certification and compliance (rather than the justifications for FCA's MY 2014-2016 strategies from an enforcement perspective, which is the subject of ongoing separate discussions). We look forward to speaking with you on Friday.

As discussed, we will also follow up that call with a face-to-face visit the first week of August to provide CARB staff all the opportunity to discuss the details needed with our Powertrain colleagues.

Sincerely,

Steven R. Mazure
